

**References (material database, v4.2, 04.06.2024)**

**References for the air and fluid properties** listed in our database. Values for fluids of which the properties are not available in the literature are substituted with values from other fluids. In these cases, the fluid used for the value is listed instead of a reference. The rationale for each individual substitution is provided in the Rationale for Tissue Substitutions.

**Not in Database:** Values for that property are not yet included in the fluid properties database.
